

PROFESSIONAL SUMMARY

DevOps Engineer with **4+ years** of experience building and operating production-grade cloud infrastructure and Kubernetes platforms. Specialized in infrastructure automation, CI/CD optimization, observability, security and cost-efficient systems. Proven track record of improving reliability, deployment velocity, and system performance at scale.

SKILLS

Cloud & Infrastructure	AWS, GCP, Kubernetes, Openshift, Istio, KVM, QEMU
Automation & CI/CD	Jenkins, GitHub Actions, Helm, Terraform, JFrog, Maven
Observability & Reliability	Prometheus, Grafana, EFK, SLI/SLO/SLA, OpenTelemetry
Databases & Queues	Redis, PostgreSQL, ActiveMQ, Kafka
Programming Languages	Python, Shell (Bash), Go
Security & Compliance	Coverity, Mend, SonarQube, Xray, Renovate, Contrast, Seeker, Snyk

WORK EXPERIENCE

- Software Engineer 2 (DevOps), *Candescent*

Oct 2024 - Present

 - Migrated Kubernetes traffic management from **Ingress-NGINX** to **Gateway API**,improving networking standardization and cluster scalability.
 - Automated provisioning of **15+ AWS** services using Terraform (Infrastructure as Code), reducing manual setup time by **80%**.
 - Integrated **SAST, SCA, DAST, IAST, SBOM, container image scanning** tools into CI/CD pipelines, **shift-left** security paradigm and eliminating vulnerabilities before production.
 - Built and tuned a full-stack observability platform covering **metrics, logs, and distributed tracing**; implemented CloudWatch cost alerts, reducing AWS compute and storage spend by **25%**.
 - Led production incident management and **RCA** with SRE teams, maintaining **SLA** and **high-availability** commitments.
- Software Engineer 2, *NCR Voyix*

Apr 2023 - Sep 2024

 - Engineered **JVM warm-up** logic and **HPA tuning**, reducing cold-start latency from **520ms to 270ms**.
 - Enforced CI/CD release consistency via **Git branching strategy**, semantic versioning, and **automated Git hooks**.
 - Owned **Linux system administration**, troubleshooting **networking** and **OS-level issues** while automating routine maintenance tasks to reduce manual effort by **40%**.
- Software Engineer, *NCR*

Mar 2021 - Mar 2023

 - Streamlined **Jenkins CI** workflows using **parallel stages, dependency caching, and shared libraries** cutting build time by **75%** and doubling **deployment frequency**.
 - Built **multi-stage Dockerfiles** for reusable **TomEE** and **Nginx** base images and packaged them into production-grade **Helm charts**, standardizing container builds and deployments across 10+ microservices.
 - Re-architected a **bare-metal Kubernetes cluster** on **RHEL** by replacing default **CNI and CRI components (Flannel → Calico, Docker → Containerd, kube-dns → CoreDNS)**, improving **network policy, runtime performance, and DNS reliability**.
 - Automated **Kubernetes cluster provisioning** on RHEL servers, reducing setup time from **120 minutes to under 10 minutes**.

Education

Ajay Kumar Garg Engineering College, AKTU | Ghaziabad, IN
B.Tech, Computer Science and Engineering | 2017 - 2021 | GPA : 8.2/10
